Test instruments and remarks

* L test by CHROMA 3302 meter or equivalent.

* DCR test by Tonghui TH2516B meter or equivalent.

* CHROMA 3302 and 1320 meter for IDC.

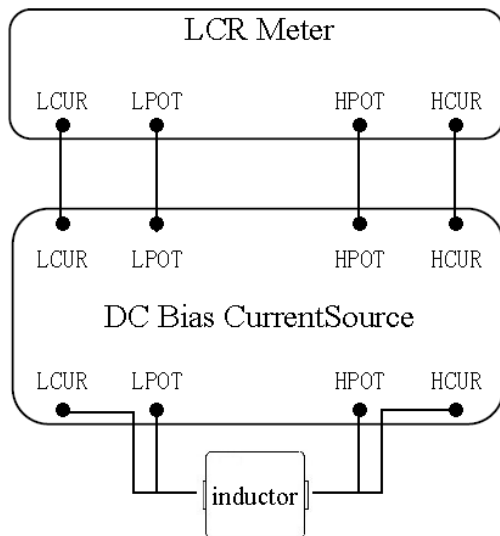

* Rated current: Isat or Irms, whichever is smaller:

Isat: DC current (A) that will cause L0 to drop approximately 30%.

Irms: DC current (A) that will cause an approximate ΔT of 40℃.

* Maximum rated voltage: DC 20 V.

* The part temperature (ambient + temp rise) should not exceed 125℃ under worse case operating conditions. Circuit design, component placement, PCB trace size and thickness, airflow and other cooling provision all affect the part temperature. Part temperature should be verified in the end application.
